Electrolux Professional
Washer and Dryer

Introducing your two co-workers

...producing hundreds of tons of clean linen – fast and efficient: The Electrolux washer and dryer for professionals

Producing hundreds of tons of laundry – fast and efficient

You will get all the clean laundry you want. Your two co-workers will be able to wash and dry more laundry in their service lives than you could ever imagine. Our machines are designed for professional users; with a capacity of 9 kg of laundry and life span of 15,000 cycles.

110 years of experience guarantees lasting satisfaction

Thanks to your **two co-workers**, you will enjoy not having to think about the laundry. From the very beginning, they were designed to satisfy professional demands. At first sight, you immediately notice their robustness and modern aesthetics.

You will be impressed by your **two co-workers**, who are very **fast**, giving you more time to deal with other important daily matters. Wash and dry a full load of laundry in 91 minutes.

Low running costs

As always, with Electrolux, there are extensive cost savings. Your **two co-workers** are modest in their daily demands and will soon demonstrate their **low running costs** attributed to the reduced energy and water consumption.

Better working environment

You will enjoy the difference that your **two co-workers** make, with their user friendly displays, control panel and programs. The remaining wash time is shown on the display informing you when it's time to unload.

And there's no waiting around – the door can be opened as soon as the drum has stopped rotating.

These are just some of the many features that will make the Electrolux machines attractive co-workers for your business.

The professional washer and dryer from Electrolux

- Compact washer and dryer designed for professionals with medium size washing needs
- Easy to operate with up to 9 kilos of laundry at a time
- 6 wash programs (90°C white, 60/40°C color/synthetic and 30°C delicate)
- Low noise level for a pleasant working environment
- Low energy consumption
- Time and temperature can be selected on the dryer
- Anti-crease cycle avoids creasing if the laundry is not immediately unloaded
